loaded on 5 February 1953. Those elements of the brigade that had taken part in practices in the Stendal area and had been loaded on 3 February returned on 9 February. The return from Tangerhuette of these elements is confirmed by records on rail movements.

3. Comment. The loading was probably made by units of the 20th Army AT Arty Brig (US), whose destination can be confirmed by records on rail movements. Sukow is located southeast of Schwerin, in an area which had several times before been used for practices by the 94th Gds Mtz Rifle Div. According to another report, units of the 6th Arty Div from Bethenow were transferred the same day, presumably for joint practices in this area.
